Currently.The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichronian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree.. As they climbed inside, Jay entered a code into the- panel by the door to specify their destination in the Jersey module, and they sat down on an empty pair of facing seats as the capsule began to move. After a short run up to speed, it entered a tube to exit from Maryland and passed through one of the spherical intermodule housings that supported the Ring and contained the bearings and pivoting mechanisms for adjusting the module orientations to the ship's state of motion. For a brief period they were looking out through a transparent outer shell at the immensity of the Spindle, seemingly supported by a web of structural booms and tie-bars three miles above their heads, with the vastness of space extending away on either side, and then they entered the Kansas module where the scene outside changed to animal grazing enclosures, level upon level of agricultural traits, fish farms, and hydroponics tanks.. three additional tidbits that his young master was conned into sharing, instead of had married the congressman five years ago, before the first of his three successful political campaigns. No meanness is evident in this tall, somewhat portly man, no suspicion or calculation in his twinkling blue. Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?" "I never found out who he was. An air line ruptures and pressure falls and the brakes. Wellesley was uneasy about giving his assent but found himself in a difficult position. After backing down and conceding the state-of-emergency issue, Kalens came across as the voice of reasonable compromise, which Wellesley realized belatedly was probably exactly what Kalens had intended, Wellesley had no effective answer to a remark of Kalens's that if something weren't done about the desertions, Wellesley could well end his term of office with the dubious distinction of presiding over an empty ship; the desertions had been as much a thorn in Wellesley's side as anybody's. squeaks softly, as do the hinges, and the door swings outward. Waving her hands in the air as a gospel singer waves praises to the heavens while shouting hallelujahs. Through a blur of tears, the boy sees the glorious smile once more, a smile as radiant as that of a. Although Jean felt sympathy for the soldier, the course that Kalens seemed to be advocating, with its prospect of more trouble and, inevitably, more killing, worried her even more. Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her-as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. So why should other people's squabbles which were not of her making now threaten her with sweeping it all away? "Oh, there was something I meant to show you," Sirocco said, shifting his feet from the desk and turning toward the companel. "It come in earlier this evening. Want a laugh?" in revelation. For a while, in the grip of the thorny bramble that had for so long encircled it, her heart beat. "You'd like Constance Tavenall," he said.
